

Guide Line from Helisafe is a yellow high performance rope with premium Polyester cover and Dyneema® core. The Guide Line is available in 8mm or 10mm diameter and standard length in 50 meter and 70 meter. The length can be customized in other length upon request. The Guide Line has a plastic thimble in each end. The rope ends are coated in red and green color to make it easy to pack and deploy the Guide Line. The Guide Line must always be used together with a weak-link between the Guide Line and the hoist hook to protect the helicopter in case of emergency situation.
